THE REASONS FOR ALLOWANCE

The applicant's response filed August 20, 2004. Claims 32-93 are pending.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 32-93, no prior art has been found teaching or suggest the reactive probe chip for detecting target functional molecules comprising one or a plurality of a first porous carrier in the form of a particle, having immobilized within the pore a first reactive substance capable of binding a first target molecule, one or a plurality of second porous carrier probes in the form of a particle, having immobilized within the pore a second reactive substance capable of binding a second target molecule and a substrate material.

The closest prior art is the reference of Findlay et al. Findlay et al. disclose the probe comprising an oligonucleotide, which is covalently attached to a water-insoluble particle (See column 2, lines 48-54). Findley et al. do not disclose a porous carrier in the form of a particle, having immobilized within the pores a first reactive substance or a second reactive substance as required by claims 32 and 64.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is 571 272-0790. The examiner can normally be reached on Monday - Friday, 8:30-5:00.
